

## Saving Children in all Tehsils of Sindh

Alhamdulillah, ChildLife has reached another milestone of expanding its children's emergency care network in **all tehsils of Sindh** with a presence in 9 Emergency Rooms and 100+ Telemedicine Satellite Centres.

**Now every child is within 30 minutes of emergency care in Sindh**

The expansion of ChildLife's Telemedicine network now covers not only district and tehsil hospitals of Sindh, but also rural health centres and basic health units where tehsil hospitals are not available. This allows expert pediatricians to provide consultations and treat children remotely, 24/7 and free of charge. This model also enables parents living in far-flung areas to get quality emergency care for their children closer to their homes, saving them from traveling costs to reach bigger cities for treatment and preventing them from falling into the debt trap.

# Eid-ul-Adha Mubarak

May Allah accept your prayers & sacrifices and  
bless you with good health & happiness

**Telemedicine Control Room, Lahore**

### 1<sup>st</sup> Telemedicine Satellite Centre is Operational in Punjab

Alhamdulillah, ChildLife has launched its first telemedicine satellite centre in Punjab at DHQ Hospital Jhang. The site is operational with a ChildLife deployed registered nurse and equipped with a high-definition camera and an IP phone, connected to our newly established Telemedicine Control Room in Lahore. ChildLife expert doctors are available in our TM Control Room to provide consultations to the on-ground medical staff in DHQ Hospital Jhang.

By 14<sup>th</sup> August 2023, we aim to establish Telemedicine Satellite Centres (TSCs) in all 36 districts of Punjab, insha'Allah.

ChildLife provides life-saving treatment to more than 1.5 million children annually in its 12 children's Emergency Rooms & 140+ Telemedicine Satellite Centres in public hospitals across Pakistan. Insha'Allah soon, ChildLife will have presence in all public tertiary and secondary care hospitals across Pakistan.

### Developing the Next Generation of Pediatricians

ChildLife Foundation celebrated the Graduation Ceremony of the Essentials of Pediatric Emergency Medicine Course (EPEMC) and Advanced Pediatric Emergency Medicine Course (APEMC) which was completed by 116 clinical team members of Sindh & Balochistan. These courses aimed to educate physicians on best practices in pediatric emergency medicine, enhancing their expertise in managing a diverse range of cases. By equipping them with up-to-date knowledge and skills, ChildLife ensures they deliver high-quality emergency care to children. ChildLife prioritizes continuous learning and development, recognizing the crucial role of clinical staff in saving lives.

This achievement highlights ChildLife's commitment to fostering professional growth and empowering healthcare professionals to provide exceptional care. The organization takes pride in the graduates' dedication and considers ongoing education essential, solidifying their position as leaders in pediatric emergency care.

### Healing Little Souls: Baby of Sakina

For Sakina and her family, the birth of their child quickly turned into a crisis. Just an hour after delivery, they were alarmed by the newborn's lack of response. In a desperate race against time, they rushed to ChildLife's children's Emergency Room (ER) at Abbasi Shaheed Hospital, Karachi.

Our medical team sprang into action, swiftly diagnosing the child with septic shock. Immediate and intensive treatment was administered, including oxygen flow and IV antibiotics with life-saving medicines to stabilize his condition. With dedicated care, the child's condition stabilized with continuous monitoring and treatment in the resuscitation room.

Zameer, the child's father, and a daily-wage laborer feared the financial burden of his son's treatment. However, our ER doctors provided reassurance, reminding him that ChildLife offers free-of-charge emergency care, 24/7. Zameer expressed his gratitude, saying, "I am thankful to witness my child recover from such a critical condition. The staff not only saved my child's life but also showed immense empathy during this challenging time."

Together, we are transforming pediatric emergency care, one precious life at a time. With your continued support, we can ensure every child in Pakistan receives the urgent care they deserve.
