

Starting from one children's Emergency Room (ER) in 2011, today, ChildLife is saving children in 75+ hospitals across Pakistan. This includes 11 state-of-the-art ERs and 67 telemedicine satellite centers.

With each year, as we improve children's access to quality care, we get closer to our goal of making Pakistan a child-safe country.

ChildLife has successfully provided 100,000 free consultations to children through its telemedicine system.

Using a physician-to-physician model of care, ChildLife's telemedicine network is improving children's healthcare in rural regions by ensuring:

- **Quality:** consultations by a children's specialist
- **Capacity-building:** training of on-site government doctors
- **Reduced burden:** saved travel costs and shorter time-to-treatment

Making Headways: ChildLife's 12th ER in PIMS, Islamabad

Renovation of the children's ER in PIMS, Islamabad, is in full swing.

The modernization plan includes increasing the ER's capacity from 12 to 30 beds. It will help cater to the region's burgeoning need for affordable quality care for children.

The 5000 sq. feet facility is set to open its doors in August 2022.

Hope for Every Mother

"I prayed and fasted so my third child would be born healthy," Zeenat said. Although she has a sunny disposition, she starts to cry as she reveals that her older son and daughter are both blind. It has made her particularly sensitive about her 7-month-old Hamza.

Hamza grabs everyone's attention, perhaps because he's an excited baby ready to jump out of his mother's lap at a moment's notice. He has no idea about his mother's distress or his own illness.

Zeenat took Hamza to ChildLife's ER in Civil Hospital, Karachi, with complaints of chest congestion. ChildLife's staff gave timely medical help to him and Zeenat took her recovered son home, satisfied with the service provided.

Help ChildLife ensure health for babies like Hamza.
